Hotel designed by Sybarite Architects would feature a two-storey jungle at the top of the 28-storey building. Developers are said to be hovering over this unique 7-star hotel in Dubai designed by Sybarite Architects after a major hotel group showed interest in putting up the funds.

The US\$350m (£173m) 28-floor Aperiron building would be 300m from the Dubai coast and accessible only by boat or helicopter.

As well as 438 luxury suites, it would contain a spa, an art gallery, and an underwater restaurant with views into a surrounding lagoon.

To top it off, the top two floors would house a temperature-controlled butterfly jungle with tropical species.

Its unique structural design has not yet garnered a nickname, but Building staff have variously named it 'The Rollmop', 'The Pringle' and 'The Funnel'.
